Some small number of people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or patterns that they encounter in everyday life, such as those in certain television images or video games. These seizures or loss of consciousness may occur even if the person has never had an epileptic seizure.

If you or anyone in your family has ever had symptoms related to epilepsy when exposed to flashing lights, consult your doctor prior to using the Sega Dreamcast.

These symptoms may include:

In all cases, parents should monitor the use of video games by their children. If any player experiences blurred vision, eye or muscle twitching, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE.

To reduce the possibility of such symptoms, the operator must follow these safety precautions at all times when using the Sega Dreamcast:
- Sit a minimum of 0.5 feet away from the television screen. This should be as far as the length of the controller cable.
- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

Half a century has passed since humans successfully carried out their project to migrate to Mars. During the colonization, several self-governing areas formed on the red planet. But independent control was never granted. Instead, the MDA (Mars Development Agency) was created by the Earth Federation. Outwardly Mars seemed to be self-governing. In reality, it was a shackled colony completely controlled by Earth.

**DECEMBER 8TH, 2309 ...**

A sudden crackle of static bursts into Earth's atmosphere. An unexpected transmission from Mars breaks into all broadcasts - "We declare our independence. We are no longer Earth's subjects" - and all contact from Mars is lost. The red planet maintains an eerie silence. All of Earth's attempts to contact Mars fail. Realizing the situation is extreme, the Earth Federation Army readies its toughest military contingent to deploy from the moon and converge on Mars. This armed spaceforce is made up of hundreds of ships - and a few experimental fighters ... Space explodes into a battlefield. The Mars War of Independence begins!
